Conflict Minerals Disclaimer

The Birmingham Fastener group of companies;

**Birmingham Fastener & Supply – Birmingham Fastener Manufacturing - Huntsville Fastener & Supply
Dallas Fastener & Supply - ProSouth Fastener & Supply – Omaha Fastener & Supply
Alabama Aerospace - B-Fast Bolt & Supply**

We are making every effort to avoid the use of any material falling under the DRC (Democratic Republic of the Congo) Conflict Minerals Initiative, both in our manufacturing processes and in the products we purchase for resale.

We understand the human rights issues affected by supporting governments and other entities engaged in these oppressive acts and are doing all within our power to see that we do not contribute in any way to the continuation of these activities.

In our initial research we did not find any recognized use of gold, cassiterite, coltan or other listed materials in any of our products or offerings. While we do not have control over the chemical make-up of our raw materials, we will continue to make every reasonable effort to assure all that our finished components are “Conflict Free”.

For any questions, feel free to contact our Chief Engineer, Brad Porter, or me at 205-595-3511

Sincerely,

Ed Self
